

MUHAMMED HUSSAIN KARIMI

DevOps Engineer & Programmer | Co-Founder & CTO, ParminCloud | Open Source Enthusiast

Qom, Iran | +98 905 694 1384 | info@karimi.dev | karimi.dev | github.com/mhkarimi1383 | linkedin.com/in/mhkarimi1383

PROFILE

Platform Engineer, DevOps Engineer, and Backend Developer focused on Kubernetes, cloud infrastructure, and developer platforms. Experienced in building highly available production infrastructure, Kubernetes platforms, GitOps workflows, and automation systems using Go and Python. Co-Founder & CTO at ParminCloud and former DevOps Engineer at BaSalam, one of Iran's largest e-commerce companies. Active open-source contributor with contributions to projects such as OpenEBS and a strong GitHub portfolio of 150+ public repositories spanning cloud-native infrastructure, automation, and developer tooling.

EXPERIENCE

Co-Founder & CTO — ParminCloud 2023 – Present

- Co-founded a cloud infrastructure company, defining platform architecture and technical strategy.
- Designed and operated Kubernetes-based infrastructure powering managed platforms and internal developer services.
- Designed and operated KVM-based infrastructure delivering public IaaS services.
- Built automation for infrastructure provisioning, application deployments, certificate management, and platform operations.
- Developed cloud-native tooling and Kubernetes integrations in Go, including production-ready cert-manager extensions.
- Designed and maintained highly available infrastructure using HAProxy, Redis Sentinel, GitOps workflows, and Kubernetes.
- Built and maintained internal developer platforms, container image registries, Helm chart repositories, and engineering documentation.

DevOps Engineer — BaSalam | باسالم Nov 2020 – Mar 2024

- Automated infrastructure provisioning, deployments, and operational workflows using GitLab CI, Ansible, and GitOps practices.
- Designed monitoring and alerting systems with Prometheus, Alertmanager, Zabbix, and custom webhook integrations to improve operational visibility and incident response.
- Operated production Kubernetes platforms hosting critical stateful services, including PostgreSQL, MongoDB, and Elasticsearch, with responsibility for backup, recovery, migrations, and reliability.
- Developed cloud-native tooling, custom Kubernetes exporters, and lightweight operators to extend platform automation and observability.
- Managed high-throughput CI infrastructure, operating multiple GitLab Runner fleets for containerized workloads, Android builds, and Docker Buildx pipelines.

Online Instructor — Independent Dec 2014 – Nov 2020

- Delivered self-produced online courses on Linux, DevOps, and programming topics (part-time).

Xamarin / C# Developer — Freelance Dec 2014 – Nov 2017

- Built games and desktop/Android applications with Xamarin and C# (part-time).

TECHNICAL SKILLS

Platforms & Orchestration: Kubernetes (RKE, RKE2, K0s, kubeadm, Kubespray), Docker, containerd, Proxmox VE, QEMU/KVM, Kubernetes Operators (Kubebuilder, Shell Operator)

Infrastructure & Automation: Terraform, Ansible, GitOps, Helm, Helmwave, Packer, Cloud-Init, GitLab CI, GitHub Actions, Gitea Actions, Drone CI, OneDev

Networking: TCP/IP, VLAN, VXLAN, BGP, OSPF, DNS, HAProxy, NGINX, Traefik, Envoy, Kong, Cilium, Cisco NX-OS/IOS, MikroTik, FortiGate, VRRP

Observability: Prometheus, VictoriaMetrics, Grafana, Alertmanager, OpenTelemetry (OTLP), Fluent Bit, OpenSearch, SigNoz, Zabbix, Uptime Kuma

Storage & Data: PostgreSQL, MongoDB, OpenSearch, Elasticsearch, ClickHouse, Kafka, MinIO, Ceph, GlusterFS, ZFS, BTRFS

Languages: Go (Echo, Cobra, XORM), Python (FastAPI, Flask, SQLAlchemy, Typer, Click), Lua (OpenResty, Kong, Neovim), JavaScript (Vue.js, React, Next.js, Express.js), C#

Linux: NixOS, Debian, Ubuntu, Alpine, RHEL, Systemd, Performance Tuning, Linux Networking

SELECTED OPEN SOURCE PROJECTS

rawfile-localpv (*Python, Go*) — Core contributor/maintainer to OpenEBS's dynamic stateful local-PV provisioner for Kubernetes; API server, upgrade tooling, and bug fixes. github.com/openebs/rawfile-localpv

kaastolon (*Go*) — Fork of Stolon (PostgreSQL HA) with custom enhancements for production use. github.com/mhkarimi1383/kaastolon

arvancloud-certmanager-issuer (*Go*) — cert-manager ACME DNS01 solver webhook for ArvanCloud, maintained under ParminCloud. github.com/ParminCloud/arvancloud-certmanager-issuer

reflector (*Go*) — Generic Kubernetes shell operator that reflects any resource kind across namespaces, including auto-created secrets. github.com/mhkarimi1383/reflector

kvm (kubectl Version Manager) (*Go*) — CLI tool to install and switch between multiple kubectl versions. github.com/mhkarimi1383/kvm

haproxy-redis-sentinel (*Python*) — Pub/sub Sentinel master-change notifier that updates HAProxy via its Runtime API. github.com/ParminCloud/haproxy-redis-sentinel

nixos (*Nix*) — Personal NixOS system configuration using flakes and Home Manager. github.com/mhkarimi1383/nixos

LANGUAGES

English: Full professional proficiency

Persian: Native / bilingual proficiency
